## Statewide Building Code In 2004

The regulations for the statewide building code that was passed in 1999 are now in their final form. After being passed by the state legislature and signed by Governor Ridge, the statewide building code has gone through a long process of drafting and revising.

The code, which provides standards to regulate commercial and residential construction, will take effect statewide no later than August 7.

As always if you are building in Greene Township, please contact the Greene Township Zoning Office at (717)263-4990 to find out what regulations you will need to meet. The Greene Township Zoning Office will continue to issue permits that certify compliance with the Greene Township Zoning Ordinance. Once the statewide building code has taken effect, you will also be required to get a building permit and have related inspections to certify compliance with the statewide building code. The Greene Township Board of Supervisors and staff will do our best to assist you through this process.

Current permits issued by our Zoning Office are good for eighteen months. If Greene Township's permit is issued prior to the statewide building code implementation, your structure will be exempt from the building code's regulations.

Accessory structures under 500 square feet will also be exempt from building code regulation.
